RAYMOND SMITH

Software Developer | Computer Science Student

Arcata, CA • Smithrj0108@gmail.com • github.com/raymondsmith-ai • raymondsmith-ai.github.io

PROFESSIONAL SUMMARY

Computer Science student at Full Sail University with hands-on experience developing C++20 applications and cybersecurity training tools. Skilled in object-oriented programming, SQL fundamentals, Docker-based labs, debugging, automated testing, and Git/GitHub workflows. Seeking opportunities to apply software engineering skills while continuing to develop secure, maintainable applications.

TECHNICAL SKILLS

Languages: C++20, SQL, HTML, CSS

Tools: Microsoft Visual Studio, Git, GitHub, GitHub Projects, Docker Desktop, SQLite, PowerShell

Concepts: Object-oriented programming, data structures, file I/O, input validation, save/load systems, debugging, regression testing, version control

TECHNICAL EXPERIENCE & PROJECTS

BugBountyTrainer | C++20, SQL, Docker, Git, GitHub

github.com/raymondsmith-ai/BugBountyTrainer

- Developed an interactive cybersecurity training console application with researcher profiles, progressive lessons, challenges, XP rewards, and simulated hands-on labs.
- Built SQL fundamentals and SQL injection training modules, Docker-based practice environments, and persistent save/load functionality with corrupted-file validation.
- Maintained automated regression tests, documenting 52 passing checks; managed feature work with branches, pull requests, issues, and project milestones.

Version Control Practice | C++, Git, GitHub

github.com/raymondsmith-ai/version-control-practice

- Created an interactive console project while practicing feature branching, commits, pull requests, and merge-conflict resolution.

EDUCATION

Full Sail University | Computer Science | Expected Graduation: April 2027

Coursework: C++ programming, systems programming, object-oriented development, software projects, and professional development.
